Professional Summary

QA Automation Engineer with 2+ years in high-volume payment systems (Mastercard, VISA, PCI-DSS), now applying domain depth toward AI/ML engineering. Built and shipped a production-grade AI Incident Intelligence Platform using RAG pipelines, LLM integration, FastAPI, ChromaDB, and Docker. ISTQB Certified with GCP and Generative AI certifications.

Experience

Worldline Global Services

Jun 2025 – Present

Associate Engineer

Pune, India

- Architected a **Python-based defect detection and log-analysis pipeline** covering **30+ payment flows/day**, cutting manual triage effort by **~40%** and accelerating root-cause identification for production incidents.
- Engineered an internal GUI data-extraction framework enabling automated end-to-end transaction validation across **3 critical payment workflows** previously dependent on manual verification.
- Maintained **regression and smoke test suites** within a **CI/CD pipeline (Jenkins)**, ensuring stable build verification across every deployment to staging and pre-production.

Worldline Global Services

Oct 2024 – May 2025

Graduate Engineering Trainee

Pune, India

- Designed a **test automation framework** for Mastercard/VISA flows (ESTEY project), raising coverage to **~90%** under **PCI-DSS compliance**; uncovered **5 critical production defects** through data-driven analysis.
- Contributed to **API test automation** for payment gateway integrations, validating request/response schemas, error codes, and edge-case handling using Python and REST principles.

Worldline Global Services

Jun 2024 – Sep 2024

QA Engineering Intern

Pune, India

- Executed functional, regression, and integration testing for payment gateway integrations; built foundational expertise in transaction-level log analysis.

Technical Skills

- **AI & Backend:** RAG Pipelines, LLM Integration, Vector Databases (ChromaDB), FastAPI, SQLAlchemy, Prompt Engineering
- **Test Automation:** Selenium WebDriver, Pytest, Robot Framework, TestNG (Java)
- **Languages:** Python (primary), SQL, Java, JavaScript
- **CI/CD & DevOps:** Docker, Jenkins, Git, GitHub Actions, OpenShift (Foundational), Unix/Linux
- **QA Methodologies:** Shift-Left Testing, BDD, TDD, Risk-Based Testing, PCI-DSS Compliance Testing

Projects

AI Incident Intelligence Platform

2025

Python, FastAPI, RAG, LangChain, Gemini API, ChromaDB, PostgreSQL, Docker

- Built a **production-grade AI platform** for DevOps/SRE teams that ingests operational logs, performs **semantic vector search**, and generates **AI-powered Root Cause Analysis** using a RAG pipeline backed by Google Gemini.
- Designed a **provider abstraction layer** (Strategy Pattern) for zero-code LLM switching; delivered **88 passing tests** across unit, service, and API layers with full **Docker Compose** orchestration.
- github.com/Atharvagarud137/ai-incident-intelligence-platform

Credit Card Fraud Detection — ML Validation Pipeline

2024

Python, Scikit-learn, Pandas, Pytest, Jupyter

- Built an ML-powered validation pipeline for fraud detection on imbalanced datasets; automated evaluation using precision, recall, F1-score, and confusion matrix metrics.
- github.com/Atharvagarud137/Credit-Card-Fraud-Detection

Deepfake Detection System

2024

Python, TensorFlow, OpenCV, CNN, Jupyter

- CNN-based model achieving **92% accuracy**; applied data augmentation and dropout regularization with end-to-end train/eval/test pipeline.
- github.com/Atharvagarud137/deepfake-detector-project

Education

Pimpri Chinchwad College of Engineering

2020 – 2024

B.Tech in Information Technology

Pune, India

Certifications

- **Quality Engineering:** ISTQB Certified Tester — Foundation Level (CTFL)
- **Google Cloud:** Prompt Design in Vertex AI | MLOps on GCP | Introduction to Image Generation
- **Generative AI:** Fine-Tuning LLMs | Generative AI Agents | Build a Generative Language Model from Scratch
